

MinerAgent Upgrade Guide

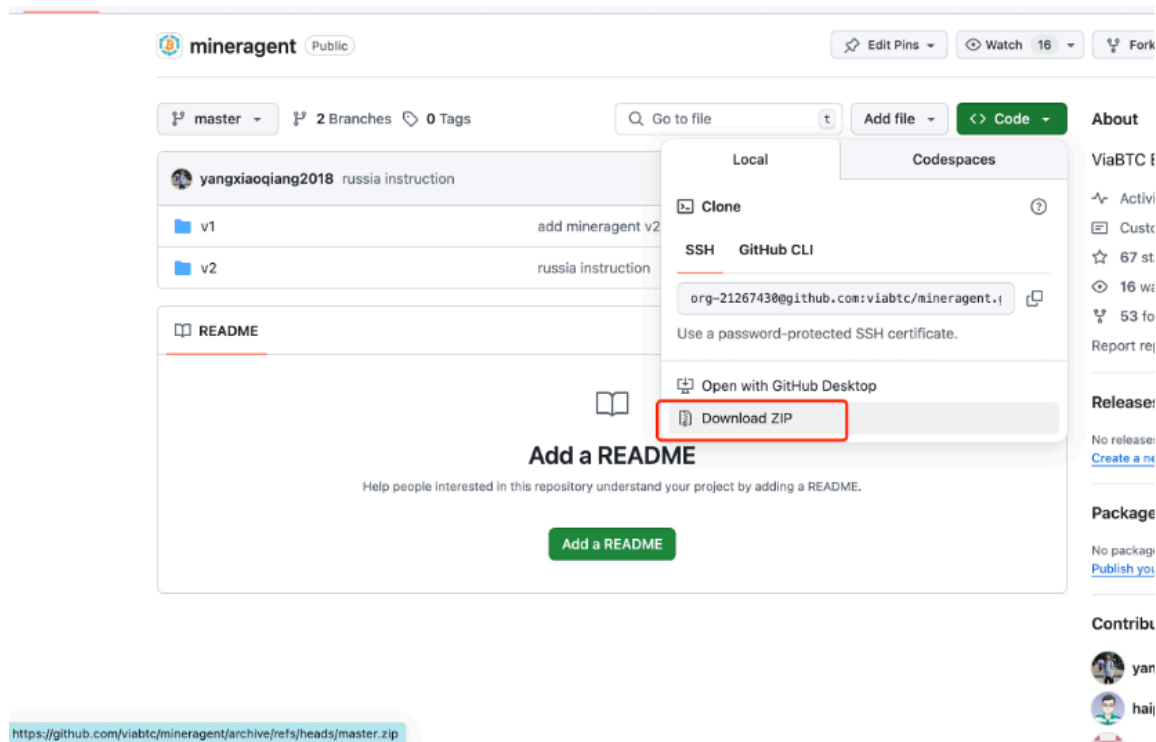

1. Download MinerAgent V2:

Open your browser and go to <https://github.com/viabtc/mineragent>. Locate the download link as shown in the image and click to download.

Command line download (Optional):

If you prefer using the command line, you can download directly with the following command:

```
wget https://github.com/viabtc/mineragent/archive/refs/heads/master.zip -O mineragent-master.zip
```

2. Unzip the installation package:

```
unzip mineragent-master.zip
```

3. Locate the original MinerAgent directory:

Find the **btc_mineragent** folder where the previous btc_mineragent is installed and running.

For example, if the path is `~/btc_mineragent`, make sure to remember this directory.

```
ubuntu@ip-10-10-2-145:~/btc_mineragent/bin$ ll
total 5412
drwxrwxr-x 2 ubuntu ubuntu 4096 Jun 25 04:06 ./
drwxrwxr-x 6 ubuntu ubuntu 4096 Jun 25 04:06 ../
-rwxr-xr-x 1 ubuntu ubuntu 5529296 Jun 25 04:06 btc_mineragent.exe*
ubuntu@ip-10-10-2-145:~/btc_mineragent/bin$
```

4. Replace old files:

Replace the files in the `btc_mineragent` folder (located in Step 3) with the newly decompressed files.

[mineragent](#) / [v2](#) / [linux](#) / [btc_mineragent](#) / [bin](#) / 

yangxiaoqiang2018 add mineragent v2

Name	Last Modified
..	
 btc_mineragent.exe	add

5. Restart MinerAgent:

After replacing the files, navigate to the folder path mentioned in step 3 and run the following command to restart the program:

`./shell/restart.sh`
